

Errors

Codex uses conventional HTTP response codes to indicate the success or failure of an API request. In general: Codes in the 2xx range indicate success. Codes in the 4xx range indicate an error that failed given the information provided (e.g., a required parameter was omitted, an entry creation failed, etc.). Codes in the 5xx range indicate an error with Codex's servers.

HTTP response codes

Below you can find the list of HTTP status code used by Codex API in responses.

Code	Type	Description
200	OK	Everything works as expected.
204	No Content	Everything works as expected, but there is nothing to return. Usually used in delete requests.
400	Bad Request	The request was unacceptable, often due to missing a required parameter or validation error.
401	Unauthorized	No valid token or API key was provided for making API requests.
403	Forbidden	The token or API key doesn't have the necessary permissions to perform the request.
404	Not Found	The requested resource was not found.
409	Conflict	The request conflicts with another request, usually happens in entry or models update requests.

Code	Type	Description
500	Internal Server Error	Something went wrong internally while processing the request.
502	Bad Gateway	Something went wrong with Codex servers.
503	Service Unavailable	Something went wrong with Codex servers.
504	Gateway Timeout	Something went wrong with Codex servers or there is a network/routing problem.

Codex response codes

In 4xx range errors, Codex API returns a response body with detailed information about the error. All errors in Codex contain the following schema

```
{
  "code": "1001",
  "message": "Error message."
}
```

The code represents a unique custom Codex error code, which can be used to find more detailed information about the error in the documentation. The message is a short description about the error. On validation errors, the response body contains another field, `errors` which contains additional informatio about each field that contains validation failures. An example of validation error:

```
{
  "code": "1002",
  "message": "One or more validations failed.",
  "errors": {
    "field_1": [
      {
        "code": "2001",
```

```
        "message": "Field field_1 is required."
      }
    ],
    "field_2": [
      {
        "code": "2002",
        "message": "Field field_2 can contain only characters and
numbers."
      }
    ]
  }
}
```

Below you can find the complete list of error codes used by Codex.

Models API

Code	Message
2001	Invalid model.
2002	Field type is invalid
2003	Fields must have unique aliases
2004	Model not found with id or alias: {idOrAlias}
2005	Only letters and numbers should be used in field alias
2006	Field attributes are null or empty
2007	Missing alias for {fieldType} field type.
2008	Missing name for {fieldType} field type.
2009	ValueType of {alias} field is not valid.
2010	{rangeOperator} is not valid

Code	Message
2011	Range operator is not defined.
2012	Model version with id: {id} not found.
2013	Model with alias: {alias} already exists.
2014	ModelId is required.
2015	Alias is required.
2016	Alias should start with a letter and contain only letters and numbers.
2017	Alias is reserved.
2018	Name is required.
2019	Name should contain only letters and numbers.
2020	Icon is required.
2021	Id is invalid.
2022	No fields found in the model.
2023	Title field is not provided.
2024	Slug field is not provided.
2025	Field alias {alias} is not allowed.
2026	Field '{alias}' cannot be active and deleted in the same time.
2028	Min cannot be null when operator is AtLeast
2029	Max cannot be null when operator is AtMost

Code	Message
2030	Min cannot be null when operator is Between
2031	Max cannot be null when operator is Between
2032	Min cannot be greater than Max when operator is Between
2033	Exactly cannot be null when operator is Exactly
2035	Model with external id: {externalId} already exists
2036	{fieldType} is undefined.
2037	Missing RevisionId.
2038	Wrong Model RevisionId. You need to pull latest version of object in order to update it.
2042	You do not have access to delete models
2043	You do not have access to create models
2044	You do not have access to view models
2045	You do not have access to publish models
2046	You do not have access to update models
2047	You do not have access to manage models

Entries API

Code	Message
2101	One or more entry field values are invalid.
2102	Entry VersionId: {versionId} is invalid.
2103	Site: {siteId} is forbidden to create or update this entry
2104	Entry with id: {id} not found.
2105	Missing RevisionId.
2106	Cannot change status from {oldStatus} to {newStatus}.
2107	Entry version with id: {id} not found.
2108	One or more labels are not valid
2109	Published DateTime should be set
2110	Status is undefined
2111	Unpublished DateTime should be set after publication date
2112	Unpublished DateTime should be set after actual date
2113	Entry title is required
2114	Content contains a field ({field}) that is not configured!
2115	Entry slug is required
2116	Slug is not a valid slug
2117	Slug must be unique
2118	One of the entry specified metrics is invalid

Code	Message
2119	Field {fieldName} is not unique in collection
2120	Referred entry with id: {entryId} does not exists
2121	Referred model with alias: {model} does not exists
2123	{field} is required
2124	Field {field} is not a valid list
2125	Field {field} is not a valid single value
2126	{value} is not in predefined values
2127	{field} must be at least {min}
2128	{field} must be at most {max}
2128	{field} must be at most {max}
2128	{field} must be at most {max}
2129	{field} must be between {min} and {max}
2130	{field} must be exactly {exactly}
2131	{field} {value} value does not match the defined format
2132	Entry with external id: {externalId} already exists.
2133	{field} ValueType is undefined
2134	Min cannot be null when operator is AtLeast
2135	Max cannot be null when operator is AtMost

Code	Message
2136	Min cannot be null when operator is Between
2137	Max cannot be null when operator is Between
2138	Min cannot be greater than Max when operator is Between
2139	Exactly cannot be null when operator is Exactly
2140	Section id: {sectionId} is is not valid.
2141	Author id: {authorId} is is not valid.
2142	Model {model} is not valid.
2143	Model {model} is not accepted.
2144	Entry id: {entryId} is not valid.
2145	Tag: {tag} is in not valid.
2147	Wrong Entry RevisionId. You need to pull latest version of object in order to update it.
2155	You do not have access to view entries
2156	You do not have access to create entries
2157	You do not have access to update entries content
2158	You do not have access to update entries labels
2159	You do not have access to delete entries
2160	You do not have access to publish entry

Code	Message
2161	You do not have access to schedule entries
2162	You do not have access to unpublish entry

Authors API

Code	Message
2301	Author Id is required.
2302	Byline is required.
2303	Undefined status.
2304	Author with id: {authorId} not found.
2304	Author with id: {authorId} not found.
2305	Invalid status.
2306	Biography is required.
2307	Image is required.
2308	Please provide a valid Email Address!
2309	Please provide a valid Facebook url!
2310	Please provide a valid Website url!
2311	Please provide a valid Instagram url!
2312	Please provide a valid Twitter url!

Code	Message
2313	Please provide a valid LinkedIn url!
2314	Please provide a valid Telegram url!
2315	Author with external id: {externalId} already exists.
2315	Author with external id: {externalId} already exists.
2317	You do not have access to manage authors
2318	You do not have access to view authors

Sections API

Code	Message
2501	New Parent Id not provided
2502	Section parent with id: {id} not found.
2503	Section can not add itself as parent.
2504	Section with id: {id} not found.
2505	You cannot assign a child section as this section's parent.
2506	Parent section belongs to a different site.
2507	Section title is required.
2508	Parent Section is invalid.
2509	Site Id is required.

Code	Message
2510	Section is used in [{ids}] entries.
2511	Section with external id: {externalId} already exists.
2512	You do not have access to view sections
2513	You do not have access to create sections
2514	You do not have access to update sections
2515	You do not have access to delete sections

Labels API

Code	Message
2401	Label already exists
2402	Name is required
2403	Name is not valid
2404	Label with id: {id} not found.
2405	Color is required
2406	Type is required
2407	Status is undefined
2408	You do not have access to manage labels
2409	You do not have access to view labels

Lists API

Code	Message
2601	PublishedAt or UnpublishedAt should be set in Scheduled status
2602	Name is required.
2603	At least one entry is required
2604	List with id: {id} not found
2607	List with external id: {externalId} already exists.
2608	List contains duplicate entries {duplicateEntries}.
2609	You do not have access to delete lists
2610	You do not have access to create lists
2611	You do not have access to edit lists
2612	You do not have access to view lists

Assets API

Code	Message
3000	File is required
3001	File exceeds {limit} MB limit size.
3002	File isn't supported.
3003	Type is required

Code	Message
3004	Type is not valid
3005	Title should not contain any of the following characters: \ / : * ? " < >
3006	Tag should not be empty
3007	Asset not found.
3008	One or more asset ids are not valid
3009	Suffix value is invalid
3010	At least one asset is required
3011	Uploading file has failed
3012	Storage is not configured
3013	Storage is invalid
3014	Filename is required
3015	ContentType is required
3016	Path is required
3017	Don't have access to delete asset
3018	Don't have access to edit asset
3019	Don't have access to create asset
3020	Don't have access to upload asset

Folders API

Code	Message
3300	Folder not found
3301	Maximum folder depth for nested folders has exceeded
3302	Name is required
3303	Name must be between 1 and 100 characters
3304	Folder is invalid
3305	Parent Id can not be the same as Id
3306	Option is required
3307	Invalid option provided
3308	Deleting folders has failed
3309	Don't have access to delete folder
3310	Don't have access to edit folder
3311	Don't have access to create folder

Webhooks API

Code	Message
4003	Validation failure
4004	Elastic Log search has failed

Code	Message
4005	Elastic Webhook search has failed
4006	Elastic Webhook metrics search has failed
4007	Elastic Webhook statistics search has failed
4008	Elastic Webhook success percentage search has failed
4009	Error with the underlying HTTP request. Check Method and URL
4050	Webhook does not exist
4051	Name of webhook is required
4052	Url is not valid
4053	Webhook type is invalid
4054	Number of attempts for webhook is required
4055	Content type is invalid
4056	Please provide a valid status
4057	Please provide a valid Http method
4058	Valid event types are required
4059	Header key is missing
4060	Header value is missing
4061	Filter is not supported for this webhook type
4062	Filter type should be valid

Code	Message
4063	Only one Authorization header allowed
4064	Filters should have valid Ids
4065	Only numbers, letters, and special characters, such as - and _, are permitted in the custom header key
4066	You do not have access to create webhooks
4067	You do not have access to edit webhooks
4068	You do not have access to delete webhooks
4069	You do not have access to view webhooks
4070	The limit of automatic attempts has exceeded
4071	One or more emails are invalid
4073	Url is required
4074	HTTP method of webhook is required
4075	Codex default header is not allowed as Webhook header
